

NYS OGS - List of Preferred Source Offerings

## LIST OF PREFERRED SOURCE OFFERINGS

### NOTE:

Section A of this list has been updated to reflect recommendations of the State Procurement Council as approved by the Commissioner of General Services and to include New York State labeled wines (PDF file format) granted favored source status under Section 165(4)(a) of the State Finance Law.

The List contained herein is a general listing of commodities and services offered by preferred sources.

Please contact the appropriate preferred source to obtain specifications and prices for commodities.

For services, agencies are required to provide notification describing their requirements (i.e. detailed specifications) to preferred sources which provide the required service as indicated on the List.

If, within ten days of the notification, one or more preferred sources submit a notice of intent to provide the service in the form, function and utility required, said service shall be purchased from the preferred source. If more than one preferred source submits a notification of intent and meets the requirements, costs shall be the determining factor for purchase among the preferred sources.

The preferred source shall apply to the New York State Office of General Services for review and approval of price on an individual contract basis unless otherwise indicated on the List.

**For additional information see the NYS Procurement Bulletin - Preferred Source Guidelines.**

# ABOUT NEW YORK'S PREFERRED SOURCES

## Corcraft

Corcraft is the manufacturing program of the New York State Department of Correctional Services. Corcraft's mission is to support the Department's mission in four key areas:

1. Keeps inmates employed to help prevent disruption
2. Helps offset the cost of incarceration
3. Teaches work disciplines
4. Helps address taxpayer expectations that inmates do something productive while incarcerated.

In addition, Corcraft provides training, work experience and a work ethic to help inmates return to their communities prepared for employment. Corcraft produces approximately 300 products for office, institutional and educational markets in the following categories:

- License plates
- Office, educational and institutional furniture and equipment
- Textile and apparel goods like bedding and uniforms
- Printing and signage
- Soap and janitorial supplies
- Eyeglasses

These products are produced in 30 shops in 15 correctional facilities. Corcraft is restricted to selling its products to its own Department, state and local governments, public schools and universities, and eleemosynary not for profits. Corcraft must win customers through competitive pricing, high quality and excellent service.

## Preferred Source Program For People Who Are Blind

The mission of National Industries for the Blind of New York State, Inc. is a human and powerful one: to afford New Yorkers who are blind the opportunity to perform ably in doing meaningful work and to gain the self-respect, self-confidence and sense of purpose that productive employment can bring -- while providing quality products and services at reasonable prices to state agencies, political subdivisions, school districts, fire protection districts and public benefit corporations.

Our affiliated industries manufacture the pencils you write with, the flags you salute, the brooms that you sweep with, and the safety vests that you wear. They produce the towels that dry you, the latex gloves you wear for protection and the mops that clean your floors. They send you mail and provide answering services for phones that you call. In short, these are real jobs for New Yorkers, with an economic multiplier effect which generates additional related jobs, tax revenues and other economic benefits for the State of New York.

Our affiliated industries in New York City, Albany, Utica, Rochester, Buffalo, Elmira and Binghamton make a wide variety of products and provide a growing list of services, including CD replication and call center services that you can trust for quality and value for excellent pricing. The stability of employment opportunities for those involved in the National Industries for the Blind program is dependent upon our ability to satisfy you, the consumer, with these products and services. It is our goal to provide you with the service you deserve. Feel free to write or call with any comments. You will receive prompt, personal attention from one of our staff.

## Industries for the Disabled

---

For more than 30 years, New York State Industries For The Disabled, Inc (NYSID) has been meeting the purchasing needs of state and local government agencies while advancing employment for New Yorkers with disabilities. Under the NYS Preferred Source program, NYSID acts as a “virtual storefront” for a statewide network of 155 community rehabilitation agencies and corporate partners that employ skilled people with disabilities in both facility-based settings and community-based jobs.

Through more than 1,200 contracts that bring work to NYS communities, NYSID member agencies delivery quality goods and services at state-approved prices to fulfill individual government agency missions. In Fiscal Year 2008 alone, 3.6 million hours of work were preformed by more than 7,300 people with disabilities, who earned over \$40.9 million in wages.

Everyone benefits from Preferred Source purchasing:

- NYS government purchasers get necessary goods and services without costly time-consuming bidding
- NYSID workers with disabilities acquire marketable skills though productive jobs and wages that promote self-esteem and financial independence
- New York State gains from reduced public assistance as disabled workers become economically independent and increased government tax revenues from employed vs. dependent individuals.

NYSID's MISSION: Turning business opportunities into JOBS for New Yorkers with disabilities.

## **SUMMARY OF PURCHASING PROCEDURES**

Agencies are required to purchase commodities and services from preferred sources when such commodities and services are on the List of Preferred Source Offerings and when they meet form, function and utility requirements as determined by the agency. Detailed purchasing procedures are provided in the N.Y.S. Procurement Bulletin - Preferred Source Guidelines.

### **A) Commodities**

- 1) Agency determines and defines its needs for commodities.
- 2) Reviews List of Preferred Source Offerings.
- 3) a.) Checks preferred source catalog and product specifications; or  
b.) If the commodity is not on the List, agency proceeds with alternative procurement.
- 4) If the commodity is on the List, agency makes form, function and utility determination.
- 5) a.) If the commodity meets agency requirements, the agency makes the purchase from the preferred source; or  
b.) If it does not meet requirements, the agency provides a 10 day notice to the preferred source.
- 6) a.) Within 10 days, the preferred source may indicate agreement with the agency decision; or  
b.) Provide no response to the agency; or  
c.) Provide notice to the agency that it disagrees with the agency decision.
- 7) a.) If (a) or (b) in step 6 occurs, the agency proceeds with an alternate procurement; or  
b.) If (c) occurs, the preferred source may consult with, or negotiate the procurement with the agency.
- 8) a.) If negotiations are successful, the agency may purchase from the preferred source; or  
b.) If unsuccessful, the agency may proceed with an alternative procurement.
- 9) The preferred source may file an objection with the agency commissioner which becomes part of the Procurement Record.

### **B) Services**

- 1) Agency determines and defines its need for services and develops service specification.
- 2) Reviews List of Preferred Source Offerings to determine if the service is available.
- 3) a.) Agency notifies the preferred source(s) of the need for services; or  
b.) If the service is not on the List, the agency proceeds with an alternative procurement.
- 4) a.) Within 10 days of agency notification, if a preferred source(s) responds that it wants to provide the service, the agency proceeds to step 5; or  
b.) If the preferred source does not respond, the agency proceeds with an alternative procurement.
- 5) The agency determines if the preferred source service meets the agency's form, function and utility requirements.
- 6) a.) If the preferred source service meets the agency's requirements, the agency may proceed with the procurement. If the procurement is valued in excess of \$50,000, the preferred source obtains OGS price approval.  
b.) If the service does not meet agency requirements, the agency may proceed with an alternative procurement.
- 7) If the preferred source disagrees with the agency determination, it may file an objection with the agency commissioner, which becomes part of the Procurement Record.

## USING THE LIST

Purchasing personnel should become familiar with the structure of the List and related procurement procedures. At the top of each page a description is provided as to whether the commodities or services appearing immediately below are approved as a preferred source item on a statewide basis, approved for a specific agency only, or not approved as a preferred source item but available for purchase on an optional basis.

The list is divided into five Sections designated A through E which are described as follows:

### SECTION

**A** **Commodities** in Section A have been approved as a preferred source item on a statewide basis. All State agencies, political subdivisions and public benefit corporations are required to purchase these items from a preferred source when they meet the form, function and utility requirements of the agency.

**B** **Commodities** in Section B have been approved as a preferred source item for a specific State agency, political subdivision or public benefit corporation. Other State agencies, political subdivisions or public benefit corporations may choose to purchase these commodities from the preferred source but are not required to do so. If a State agency elects to purchase from a preferred source, and the value of the procurement is in excess of \$50,000, OGS approval of the price is required. (Note: OGS price approval is not required if Corcraft is the preferred source.) If the procurement is under \$50,000, agencies are required, as for all purchases, to document reasonableness of price.

**C** **Commodities** in Section C have not been approved as a preferred source item. State agencies, political subdivisions and public benefit corporations may choose to purchase these commodities from the preferred source but are not required to do so. If a State agency elects to purchase from a preferred source, and the value of the procurement is in excess of \$50,000, OGS approval of the price is required. (Note: OGS price approval is not required if Corcraft is the preferred source.) If the procurement is under \$50,000, agencies are required, as for all purchases, to document reasonableness of price.

**Notification.** The 10 day notification requirement detailed in Step 5b of the Summary of Purchasing Procedures for Commodities on page 4 applies only to those commodities listed in Section A, i.e. commodities approved as a preferred source item on a statewide basis.

**Priority.** When purchasing commodities listed in Section A, priority among preferred services is extended first to Corcraft, then to National Industries for the Blind, and then equally to Industries for the Disabled. Commodities/Preferred Sources listed in Section A have priority over optional purchases of the same commodities in Sections B or C. Agencies making optional purchases of commodities in Sections B or C may select any preferred source listed.

**D** **Services** in Section D have been approved as a preferred source service for one or more State agencies, political subdivisions or public benefit corporations. All State agencies, political subdivisions and public benefit corporations are required to purchase these services when they meet the form, function and utility requirements of the purchasing agency. Because service contracts may vary greatly in scope of services, performance requirements, etc. each service contract with a preferred source valued in excess of \$50,000 must be reviewed and approved by the Office of General Services to ensure that prices are as close to prevailing market price as practicable, and do not exceed 15 percent above prevailing market prices among responsive offers for the same or equivalent services. If the procurement is under \$50,000, agencies are required, as for all purchases to document reasonableness of price.

**E** **Services** in Section E have not been approved as a preferred source item. State agencies, political subdivisions and public benefit corporations may choose to purchase these services from the preferred source but are not required to do so. If a State agency elects to purchase from a preferred source, and the value of the procurement is in excess of \$50,000, OGS approval of the price is required. (Note: OGS price approval is not required if Corcraft is the preferred source.) If the procurement is under \$50,000, agencies are required, as for all purchases, to document reasonableness of price.

**Notification.** The 10 day notification requirement detailed in Steps 3a and 4a of the Summary of Purchasing Procedures for Services on page 4 applies only to those services listed in Section D, i.e. services approved as a preferred source item for one or more State agencies, political subdivisions or public benefit corporations.

**Priority.** National Industries for the Blind and Industries for the Disabled have equal priority for services and when two or more of these preferred sources offer the same service, costs shall be the determining factor. If a service is listed in both Sections D and E the service must be purchased from the preferred source listed under D if it meets the form, function and utility requirements of the agency.
