

Attachment B

Template for Submitting District Proposed Local Indicators Based on Performance Data: ALBANY HIGH SCHOOL

District may propose provisional local indicators for approval by New York State Education Department (NYSED). Districts should select state provided indicators as backup, in the event the local indicators are not approved by NYSED. The proposed indicator should be research based and should have a strong correlation to student academic performance. Please provide answers to the following questions in your proposal.

1	Who will be the district's contact person with respect to this local indicator? Include phone number and e-mail address.	Mark Place, District Data Coordinator 518-475-6176 mplace@albany.k12.ny.us
2	What is the name of the proposed local indicator?	MEETING ATTENDANCE FOR GATEWAY COURSES
3	What is the rationale for proposing this local indicator? In other words, what does the proposed indicator provide that an existing state indicator does not?	Our daily attendance rate already meets the State standard; however, we know that even though our students are in school, not all of them are attending their classes. We believe that by focusing on meeting attendance for the courses that lead to a State exam, we will see improvements in both our class and Regents passing rates.
4	Should this indicator be considered a Level 1 or Level 2 indicator? Indicate the NYSED provided indicator for which the local indicator will substitute. (Level 1 indicators are those that will improve the academic achievement or safety of all students in the school. Level 2 indicators are those that will improve the academic achievement of a subgroup/cohort of students).	Level 2 This is a substitution for Chronic Attendance.
5	Is the proposed indicator already used by the school/district? If it is an existing indicator, how long has it been in use, and for what purpose is it being used (e.g., planning, reporting, accountability)?	This report is available directly in our Student Information System. We have used the report to monitor section attendance, but never specifically for this subgroup list of courses.

6	If expressed as a percent, which students will be included in the Numerator? Do these students have an identification code in <i>SIRS Manual</i> , http://www.p12.nysed.gov/irs/sirs/home.html ? If yes, please provide the SIRS code(s) for the students.	The Aggregate Days Attended by all students enrolled in the specified courses. No identification code in SIRS.
7	If expressed as a percent, which students will be included in the Denominator? Do these students have an identification code in <i>SIRS Manual</i> , http://www.p12.nysed.gov/irs/sirs/home.html ? If yes, please provide the SIRS code(s) for the students.	The Aggregate Days of Membership for all of the students enrolled in the specified courses. No identification code in SIRS.
8	What are the business rules that will be used to determine the performance standards for the indicator?	<p>Select all core courses that lead to a State Exam in ELA, Global History, US History, Living Environment, or Algebra.</p> <p>Add those sequential courses that lead to the courses that lead to the State Exam. For example, World History I leads to World History II which leads to the State Exam.</p> <p>Run the report called "Enrollment by Section" in PowerSchool for the entire school year.</p> <p>Calculate the attendance rate by using the following formula: Aggregate Days Attended/Aggregate Days Belonging (Membership) = ADA</p>
9	What is the baseline performance for the school on the proposed indicator?	2014-2015: 635249/812121 = 78.2%
10	What are the goals the school is setting for the 2015-16, 2016-17 and 2017-18 school years? (All schools using the local indicator must have the same yearly goals).	2015-2016: 83.2% 2016-2017: 88.2% 2017-2018: 93.2%

11	In the event the school does not meet the goal, are there any progress targets (yearly gains/decreases) the school is setting to achieve? (All schools using the local indicator must have the same yearly progress targets).	2015-2016: 1% = 79.2% 2016-2017: 3% = 81.2% 2017-2018: 6% = 84.2%
12	When will the data for this indicator be submitted to State Education Department (preferably by August 31, 2016)?	July 1
13	Are the data used for the indicator publicly available? If not publicly available, how will the data be shared with NYSED (e.g., e-mail, FTP)*	Data can be emailed or sent via any other means deemed appropriate by SED.
