

## **Is a magnet program right for your child?**

Parents interested in enrolling their child in a magnet school lottery should consider the following:

1. Are you interested in placing your child in a school environment with a specific theme-based curriculum or teaching methodology?
2. Do you feel your child's educational needs would be better met through a theme-based specialized program?
3. How do you feel about having your child attend a school that may not be your neighborhood school?
4. Did you visit each of the magnet schools?
